GLOBALOGIX HIRES VICE PRESIDENT OF DIGITAL SOLUTIONS

Bruce Litwin brings Digital Oilfield and collaboration technology expertise to Houston-based oilfield automation company

HOUSTON (October 22, 2009) -- GloboLogix, Inc., a Houston-based oilfield automation company, recently announced its addition of Bruce Litwin to its management team. Litwin will join the company as vice president of digital solutions, focusing on customer issues such as data management and integration, improving collaborative capabilities and retaining knowledge from the energy industry's aging workforce.

"Bruce's technical and business acumen will be extremely valuable for GloboLogix and its customers," said James Hamilton, CEO of GloboLogix. "He not only has vast knowledge of how to develop technology solutions to many of our clients' most pressing problems, but he is also an experienced entrepreneur in the upstream, midstream and downstream sectors, which will aid GloboLogix in expanding our offerings into those areas."

Litwin joins GloboLogix from his previous position as a global account manager at Science Applications International Corporation (SAIC), where he primarily focused on the company's work with a major oil and gas company. At SAIC, he integrated business processes, functional disciplines and enabled various technologies to maximize recoverable reserves for clients, while improving safety and operational efficiency. Additionally, he spearheaded the company's Digital Oilfield strategy efforts, designing and implementing advanced collaborative work environments, including real-time operations and decision support centers.

As an integral part of the development and success of several energy and technology companies such as Texas Energy, Miecoco and MergerTree Solutions, Litwin also brings extensive business expertise to GloboLogix' management team.

"By bringing a new facet to GloboLogix' service offering, I intend to not only improve our current customers' operations with the latest technological solutions, but also to expand our services into new areas and address the industry's latest challenges," said Litwin.

About GloboLogix

GloboLogix, a Houston-based oilfield services company, provides upstream oil and gas producers with a complete spectrum of services - from the wellhead to the Web site. Starting with data collection at the wellhead, GloboLogix creates custom solutions that cover all key points of the data path including local control panels, communications systems, control room

and SCADA equipment and back office technologies to deliver information where and when it's needed. By turning operational field data into actionable information, GlobaLogix ensures a usable and secure system, resulting in greater control and profitability for users in the field, office and anywhere in between.
