GLOBALOGIX ADDS NEW PERSONNEL TO SAFETY AND OPERATIONS DIVISIONS

HOUSTON -- (August 18, 2010) -- GloboLogix, an oilfield control and automation company, announced today that Freddy Cantu and Daniel Farmer have joined its safety and operations groups. Cantu joins the company as safety director, advising company leadership on health, safety and environmental practice. Farmer, an electrical and instrumentation engineer, will serve as an operations coordinator, assisting the vice president of operations and HSE in developing and refining key processes and procedures.

"We are very pleased to add such solid expertise to our company's safety and operations practices," said James Hamilton, President and CEO of GloboLogix. "Both Freddy and Daniel bring years of valuable experience and a fresh perspective that will enable us to further enhance our safety efforts and maximize our operations to more efficiently develop customized solutions to convert field data into actionable information for the oil and gas industry."

Cantu joins GloboLogix after working with several industry leaders, including Chevron and Shell. Cantu's responsibilities have ranged from proactively implementing programs encouraging employee safety to managing and enforcing OSHA standards and regulations. Initiating his career in the oil and gas industry as a roustabout more than 10 years ago, Cantu has solid knowledge of the business and brings a keen ability to manage teams and effectively promote safety compliance amongst all personnel.

Prior to joining GloboLogix, Farmer served as an instrumentation engineer at TKE Engineering & Design, where he gained a working knowledge of the oil and gas industry. He has also worked in the Texas A&M System Energy Systems Laboratory and with Bell Helicopter, where he primarily focused on measurement and data collection. Farmer earned a bachelor's degree in electronics engineering technology from Texas A&M University.

While Farmer will be based in GloboLogix' Houston headquarters and Cantu will work remotely from South Texas, both will travel frequently to the company's satellite offices in Fairfield, TX; Weatherford, TX; Carthage, TX; McCook, TX; Denver, CO; Pinedale, WY; and Canonsburg, PA.

About GloboLogix

GloboLogix, a Houston-based oilfield automation company, provides upstream oil and gas producers with a complete spectrum of services - from the wellhead to the website. Starting with data collection at the wellhead, GloboLogix creates custom solutions that cover all key points of the data path including local control panels, communications systems, control room and SCADA equipment and back office technologies to deliver information where and when it's needed. By turning operational field data into actionable information, GloboLogix ensures a usable and

secure system, resulting in greater control and profitability for users in the field, office and anywhere in between. For more information, please visit www.globlx.com
