GloboLogix Expands Operations into Canonsburg, Pennsylvania
New Operations Center Will Support Marcellus Shale Project Work

CANONSBURG, Pa. (July 1, 2010) – GloboLogix, Inc., a Houston-based field automation and data services company, announced today the opening of its operations center in Canonsburg, Pennsylvania, located at 118 Ashland Avenue. The office will primarily focus on providing support to oil and gas producers operating within the Marcellus shale play.

Specifically, the multi-bay shop will offer field activity support in controls and automation, I&E and communications to clients throughout the Marcellus region. The office will also enable GloboLogix to provide SCADA, network design, system engineering, and PLC integration and programming services to various shale projects throughout the region.

“The Marcellus shale play has a great amount of potential and opportunity that has not yet fully benefitted from the efficiency and increased production that automation can bring,” said Jim Fererro, vice president of GloboLogix. “Our expansion into Canonsburg represents our commitment to supporting our clients as they pursue opportunities in this area.”

The Canonsburg office will join the network of GloboLogix offices throughout the United States, which includes locations in Houston, Texas; Carthage, Texas; Fairfield, Texas; Weatherford, Texas and Denver, Colo.

While GloboLogix has provided SCADA & PLC services internationally in Mexico and Australia, the majority of the company’s work is done domestically in Wyoming, Colorado, New Mexico, Texas, Oklahoma, Louisiana, Arkansas and Pennsylvania.

GloboLogix can be reached locally in Canonsburg at 1-724-746-3999.

About GloboLogix

GloboLogix, a Houston-based oilfield automation company, provides upstream oil and gas producers with a complete spectrum of services - from the wellhead to the Web site. Starting with data collection at the wellhead, GloboLogix creates custom solutions that cover all key points of the data path including local control panels, communications systems, control room and SCADA equipment and back office technologies to deliver information where and when it’s needed. By turning operational field data into actionable information, GloboLogix ensures a usable and secure system, resulting in greater control and profitability for users in the field, office and anywhere in between.
