## **GLOBALOGIX NAMED INAUGURAL MEMBER OF CYGNET INTEGRATOR PROGRAM**

*Program Drives Faster Time to Value, Ensures Unparalleled Service to Joint Customers*

**HOUSTON** (June 17, 2010) -- GloboLogix, Inc. is pleased to announce that it has joined CygNet Software's recently launched Premiere Integrator Program as an inaugural member. Formalizing the partnership between the two companies will allow GloboLogix to more efficiently help customers turn operational field data into actionable information, leading to greater control and profitability.

"GloboLogix' newfound partnership with CygNet allows us to reach the next step in offering the highest level of service to our customers," said Jim Ferrero, vice president, sales and business development at GloboLogix. "We are pleased that the successful relationship we have cultivated with CygNet over the past several years has evolved into this formal integrated partner program."

Taking part in this new program will give GloboLogix access to gold-level CygNet support and allow for more training on CygNet products, as well as provide for quarterly one-on-one business reviews and proactive market planning. These elements will increase GloboLogix' ability to integrate widely used CygNet products into its customers' fields and provide a mechanism for the company to work more closely with CygNet.

GloboLogix, which has worked on CygNet implementations since 2007, was selected to participate in the program for its long-standing working relationship with the CygNet customer community and its ability to provide the highest level of integration support for CygNet SCADA solutions.

### **About GloboLogix**

GloboLogix, a Houston-based oilfield services company, provides upstream oil and gas producers with a complete spectrum of services - from the wellhead to the website. Starting with data collection at the wellhead, GloboLogix creates custom solutions that cover all key points of the data path including local control panels, communications systems, control room and SCADA equipment and back office technologies to deliver information where and when it's needed. By turning operational field data into actionable information, GloboLogix ensures a usable and secure system, resulting in greater control and profitability for users in the field, office and anywhere in between.
