GLOBALOGIX EXPANDS TEXAS PRESENCE

Houston-based oilfield automation company increases reach in the Dallas-Fort Worth area

HOUSTON (October 9, 2009) -- GloboLogix, Inc., a Houston-based oilfield automation company, announced today that Mark Jobin joined its growing sales force. Jobin joined the company as an account manager, responsible for overseeing and expanding the company's sales efforts in the Dallas/Fort Worth market.

"Mark brings an ideal blend of extensive technical expertise and a successful track record in sales," said James Hamilton, chief executive officer of GloboLogix. "We're confident that his experience and proven results will make an impact and help us broaden our footprint in the Dallas market."

A 30-year veteran in oilfield services, Jobin spent the first fifteen years of his career in the technical service side of the oilfield, working for Phillips Petroleum Company in Oklahoma, then for Otis Engineering off the shore of Louisiana. His specialties in the service sector focused on completions work and all forms of artificial lift technology.

During the latter half of his career, Jobin held various sales positions in Houston, Dallas, Fort Worth and New Orleans for companies such as Halliburton, Camco, IPS, and, most recently, Weatherford International.

Jobin added, "I'm looking forward to this opportunity to combine my technical expertise and sales experience. It's exciting to be a part of a company that is experiencing the kind of growth GloboLogix has, and I'm proud to contribute to its success."

About GloboLogix

GloboLogix, a Houston-based oilfield services company, provides upstream oil and gas producers with a complete spectrum of services - from the wellhead to the Web site. Starting with data collection at the wellhead, GloboLogix creates custom solutions that cover all key points of the data path including local control panels, communications systems, control room and SCADA equipment and back office technologies to deliver information where and when it's needed. By turning operational field data into actionable information, GloboLogix ensures a usable and secure system, resulting in greater control and profitability for users in the field, office and anywhere in between.
